Richard Braun is also sending me the contract clause that allows EPA to make unilateral changes to the SOW under a task order.

Contract clause G.7, requires that any subcontract over \$ 150K must have OSC and CO review and concurrence. Here is a quick rundown of what the clause says:

- Sole source subcontracts > \$25K require OSC & CO review and concurrence
- Competitive subcontracts between \$100K and \$ 150 K require OSC review and concurrence
- Competitive subcontract > \$ 150K require OSC & CO review and concurrence.

Subject: Gold King Mine Release - HDPE Pipe installation

Richard,

A subcontract award is pending for the HDPE pipe needed to convey the GK mine water to Gladstone area. The current estimate is \$250K. The bidders (3) were reviewed in detail by Weston's engineers, EPA (3 OSCs) and ER, LLC. The best value bid was selected, and when all costs were considered based on the respective assistance required from the subcontractor to perform the work, the costs were very similar.

It is important that we begin this work as soon as possible given the weather window that remains onsite for this type of work.

Thank you for your assistance in this matter.

Steve
